

## PWM 5-24V 16A single-color signal booster / repeater

### Ref. B1624

1-channel PWM signal repeater for LED strips and single-color luminaires of 5-24VDC and maximum 16A. High speed power amplifier (20ns), easy to install and maintenance and management free. Extend the length of your dimmable LED fixtures with signal amplifiers with a single dimmer controller. The dimming signal will be extended linearly and without delay. The placement of signal repeaters is independent of the installation of as many power supplies as necessary to feed the whole set. 5-24VDC 16A 1 channel IP20
