

Dual white CCT controller for LED strips with RF touch panel - 5-24V/DC

Ref. RF86-02

The dual white CCT controller for LED strips allows to control the lighting of CCT LED strips through a soft touch panel and high sensitivity, managing to change the shades of white and its intensity. It also saves user settings and can be easily installed on the wall with two adhesive strips (included) or two screws (not included). Compatible with most CCT LED strips on the market. Maximum range: 15 m. Ideal for creating environments with customized lighting in a simple way. Includes: one controller, one touch panel, 2 adhesive strips and one manual **

Datos del producto

202· Tensión Nominal (V)	5-24V
307· Dimensiones (mm) LxIxAn	controller: 85 x 60 x20mm - panel: 84 x 84 x 10mm
309· Peso (g)	170
310· Material	Plástico, Aluminio
312· Uso Exterior	No
313· IP	IP20
314· Rango temperatura	-20°C ~ +60°C
404· Certificados	CE, ROHS
405· Garantía	Según garantía legal: 2 años
214· Conectividad	RF
212· Control de color	CCT
215· Número de canales	2
217· Intensidad máxima (A)	10
